REMICADE®
pre-2001

STELARA®
since 2009

NEULASTA®
since 2006

LANTUS®
since 2001

AVONEX®
since 2010

LUCENTIS®
since 2007

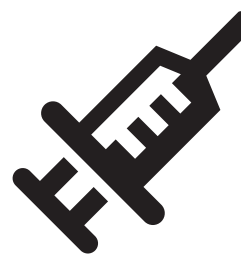

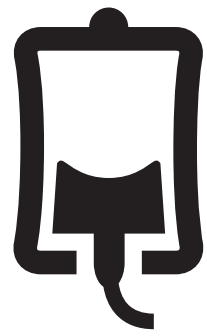

*Drugs approved prior to 2001 do not appear in the Mexican online database.

FACT

The world's largest pharmaceutical
companies launched their top-selling
biologics in Mexico.

THE MARKET **IS** WORKING

Mexico has been providing five years (not 12 or 10) of market
exclusivity for brand-name biologics and the most lucrative
biologics in the world are already available in Mexico. Don't
believe the hype. Now is the time for Congress to fix the USMCA
and lower prescription drug prices for America's patients.

It's Time to **#FixUSMCA**
for America's Patients

Don't lock in high drug prices

Don't expand pharmaceutical monopolies

Remove barriers to generic and
biosimilar market access

Incentivize generic market entry
